Interest-free installments

with all credit cards.
The program does not apply for credit cards issued abroad.

New payment plan without a card

Instant Loan

6 to 48 monthly installments

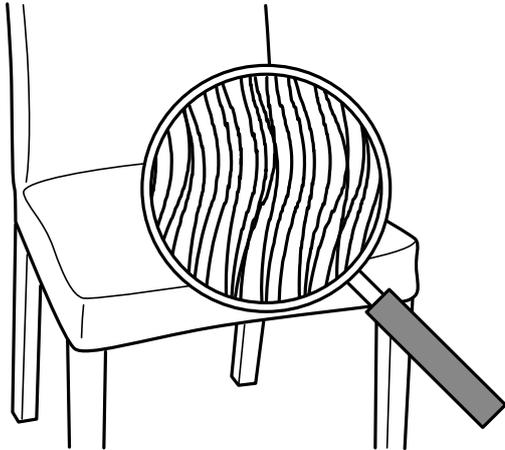

Innovation works wonders for your comfort

So that you can sit really comfortably, it's important that the chair gives your body the right support in the right place. This was the starting point for our work with BERGMUND. After studying new research on the human body, we also developed an innovative technique that shapes the seat's padding for optimal comfort. So regardless if you sit down for a quick breakfast or stay longer after a nice dinner, you can count on this chair taking good care of you.

All the products (shown here) may not be available at the store. Please contact the staff or look at www.IKEA.gr for more information. For more detailed product information, see the pricetag and the Internet. All units require assembly.

Innovation works wonders for your comfort

BERGMUND was created so that you can sit a little longer on your chair – without your legs starting to feel stiff or your back aching. To succeed, we dove into new research on the human body, looked for optimal angles and developed a new technique to get a really comfortable seat.

Sitting may not seem like an active movement, but it actually involves everything from the body's bones and muscles to tendons, cartilage and joints. "So that you sit comfortably for longer, it's important that the body enjoys the right support in the right place", explains material developer Anders Bergner.

Our key common trait – sit bones

With BERGMUND, Anders and the team studied new research to develop the shape of the seat and to find the optimal angle between the seat and the backrest. This resulted in several interesting insights about the human body – for example that the sit bones of all humans are actually very similar. "It's true, regardless if someone is 1.85 metres tall or much shorter. So the bowl-shaped bottom of the seat was given a geometry that fits 99% of the world's population."

Innovation paves a way for more comfort

The polyester in the seat's padding and backrest comprises of small vertical fibres which provide better elasticity compared to fibres which are more entangled. Anders and his team then developed an innovative technique to further increase the seating comfort by shaping the seat's padding.

"It compares to making a waffle. The polyester fibres are fed into a special tool where the correct shape fixes in place."

After several years of development, Anders hopes that BERGMUND helps people both enjoy nice seating comfort and even better moments together.

"When everyone at the table is sitting comfortably, they can relax and focus more on each other."

Good to know

Our fabrics have been tested

At IKEA we test the fabric covers on our sofas and armchairs so you can be sure they're durable. The fabric's ability to resist abrasion is tested by using a machine to rub it against another fabric while applying firm pressure. A fabric that can take 15,000 cycles is suitable for furniture that must withstand everyday life at home – and if it can take more than 30,000 cycles, it is very resistant to abrasion. All fabrics are sensitive to sunlight, which is why we also check that our fabrics resist fading effectively.

Durable in different ways

Tough tests are an important way to check the durability of our fabric covers, but they don't tell the whole story. Durability also depends on materials, construction and manner of use. Heavy, tightly woven fabrics with a flat surface are most resistant to abrasion. Fabrics with a mixture of natural and synthetic fibres can withstand abrasion better than fabrics with only natural fibers. Yarn-dyed fabrics are more durable than fabrics with printed patterns. And a dirty cover wears out faster than a clean one. The fabric is also affected by how you use your chair of course.

	Washing instructions	Resistance to abrasion (cycles)	Light-fastness (1-8)
FÄGELFORS multicolour	Machine washable at 40°C.	25.000	5
GUNNARED medium grey	Machine washable at 40°C.	50.000	5-6
HALLARP beige	Machine washable at 40°C.	15.000	5
INSEROS white	Machine washable at 40°C.	35.000	5
KOLBODA beige/dark grey	Machine washable at 40°C.	25.000	5
